. Acronis Anti-Virus Free is a modern free system security that will protect your computer from viruses, unwanted downloads, inappropriate content, and out of date programs. You will not be left vulnerable to attacks and data breaches. Acronis Anti-Virus Free is especially designed to protect you against viruses in business networks and the modern workplace. Acronis Anti-Virus Free also provides daily and real time file detection, instant scan and support for no less than 180+ file formats. - 100% protection against viruses: It detects all known viruses and all forms of malware. It protects you from the over 100,000 new viruses appearing every day, and protects you from viruses in portable media and removable devices. - Protection against spyware: It protects you from spyware that follows you around the web and monitors your activities to track your web surfing, emails, online banking, and other sensitive information. - Protection against identity theft: It protects you from identity theft

attacks and hackers who steal your information. It also scans and repairs your personal data on multiple storage devices, including laptops, tablets, USB drives, and other portable devices. - Encryption of your data: It can encrypt and decrypt files, folders and entire hard drives. You can easily share your files with friends and family and protect your information against hacking. - Privacy protection: It protects you from data mining and spying on your activities. It even protects you from the government if they demand your data without any court order or a search warrant. - Friendly, easy-to-use interface: It has a streamlined interface that is easy to use. You can easily install it, and it doesn't take long to learn. The interface is intuitive and easy to navigate. It has intelligent search capabilities, which makes it easy to find your files and applications. - Free updates: All the free updates are updated in the background without interrupting your work. You can also perform scans manually and let us know when you want us to perform a quick scan on your PC. - No cost: It is a free application that you can install and use without worrying about paying any cost. - Interactive tutorials: We provide tutorials to teach you how to perform the most important functions. You will be able to configure your protection settings right away. - Securing the office: It secures your personal data in your office, and it will protect you and your business against fraud and data breaches. 82157476af
